Geometry (Universitext) Michele Audin

Geometry, this very ancient field of study of mathematics, frequently remains too little familiar to students. Michèle Audin, professor at the University of Strasbourg, has written a book allowing them to remedy this situation and, starting from linear algebra, extend their knowledge of affine, Euclidean and projective geometry, conic sections and quadrics, curves and surfaces. It includes many nice theorems like the nine-point circle, Feuerbach's theorem, and so on. Everything is presented clearly and rigorously. Each property is proved, examples and exercises illustrate the course content perfectly. Precise hints for most of the exercises are provided at the end of the book. This very comprehensive text is addressed to students at upper undergraduate and Master's level to discover geometry and deepen their knowledge and understanding.

From reader reviews:

Bessie Morris:

Have you spare time to get a day? What do you do when you have a lot more or little spare time? That's why, you can choose the suitable activity intended for spend your time. Any person spent all their spare time to take a stroll, shopping, or went to the particular Mall. How about open or maybe read a book called Geometry (Universitext)? Maybe it is to be best activity for you. You know beside you can spend your time together with your favorite's book, you can better than before. Do you agree with their opinion or you have some other opinion?

William Todaro:

This Geometry (Universitext) is completely new way for you who has fascination to look for some information as it relief your hunger of knowledge. Getting deeper you into it getting knowledge more you know or perhaps you who still having tiny amount of digest in reading this Geometry (Universitext) can be the light food for you personally because the information inside this specific book is easy to get through anyone. These books create itself in the form that is certainly reachable by anyone, that's why I mean in the e-book web form. People who think that in publication form make them feel sleepy even dizzy this reserve is the answer. So there isn't any in reading a reserve especially this one. You can find what you are looking for. It should be here for you. So , don't miss it! Just read this e-book type for your better life along with knowledge.

Brooke Callender:

You can get this Geometry (Universitext) by visit the bookstore or Mall. Just viewing or reviewing it can to be your solve trouble if you get difficulties for your knowledge. Kinds of this e-book are various. Not only through written or printed but additionally can you enjoy this book by simply e-book. In the modern era like now, you just looking because of your mobile phone and searching what their problem. Right now, choose your personal ways to get more information about your e-book. It is most important to arrange you to ultimately make your knowledge are still change. Let's try to choose right ways for you.

Mary Alejandro:

As a university student exactly feel bored in order to reading. If their teacher requested them to go to the library or even make summary for some book, they are complained. Just tiny students that has reading's heart or real their hobby. They just do what the trainer want, like asked to go to the library. They go to right now there but nothing reading significantly. Any students feel that reading is not important, boring and also can't see colorful photos on there. Yeah, it is to become complicated. Book is very important to suit your needs. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore , this Geometry (Universitext) can make you truly feel more interested to read.
