Next Generation Wireless Communications Using Radio over Fiber

Nathan J. Gomes, Paulo P. Monteiro, Atílio Gameiro

Next Generation Wireless Communications Using Radio over Fiber Nathan J. Gomes, Paulo P. Monteiro, Atílio Gameiro

Taking a coherent and logical approach, this book describes the potential use of co-ordinated multipoint systems supported by radio over fiber. It covers an impressive breadth of topics, ranging from components, subsystem and system architecture, to network management and business perspectives. The authors show the importance of radio over fiber in eliminating or mitigating against the current, perceived barriers to the use of co-ordinated multipoint, and the drivers for standardisation activities in future mobile/wireless systems over the next few years.

The book brings together the system concept for centralized processing, including what is required for co-existence with legacy wireless systems, the algorithms that can be used for improving wireless bandwidth utilization at physical and MAC layers and the radio over fiber network and link design necessary to support the wireless system. Other important research is also covered as the authors look at compensating for radio over fiber impairments and providing simple network management functions. A study of service provision and the business case for such a future wireless system is also fully considered.

This book comes at an important time for future wireless systems with standardization of fourth generation wireless systems still ongoing. The content enables readers to make key decisions about future standardisation and their own research work. The business analysis also makes the book useful to those involved in deciding the future directions of telecoms organisations. This information will be core to their decision-making as it provides technical knowledge of the state-of-the-art but also system level assessments of what is possible in a business environment.

From reader reviews:

Anthony Anderson:

Within other case, little men and women like to read book Next Generation Wireless Communications Using Radio over Fiber. You can choose the best book if you'd prefer reading a book. Provided that we know about how is important a new book Next Generation Wireless Communications Using Radio over Fiber. You can add expertise and of course you can around the world by just a book. Absolutely right, mainly because from book you can recognize everything! From your country until foreign or abroad you will find yourself known. About simple point until wonderful thing you can know that. In this era, you can open a book or searching by internet device. It is called e-book. You need to use it when you feel uninterested to go to the library. Let's study.

Charles Siegrist:

Your reading sixth sense will not betray an individual, why because this Next Generation Wireless Communications Using Radio over Fiber e-book written by well-known writer whose to say well how to make book which can be understand by anyone who have read the book. Written inside good manner for you, still dripping wet every ideas and creating skill only for eliminate your own hunger then you still skepticism Next Generation Wireless Communications Using Radio over Fiber as good book not just by the cover but also by the content. This is one book that can break don't judge book by its protect, so do you still needing another sixth sense to pick this!? Oh come on your examining sixth sense already told you so why you have to listening to a different sixth sense.

Sonia Cramer:

As we know that book is significant thing to add our knowledge for everything. By a reserve we can know everything we really wish for. A book is a group of written, printed, illustrated or perhaps blank sheet. Every year seemed to be exactly added. This book Next Generation Wireless Communications Using Radio over Fiber was filled in relation to science. Spend your extra time to add your knowledge about your scientific disciplines competence. Some people has diverse feel when they reading the book. If you know how big advantage of a book, you can sense enjoy to read a guide. In the modern era like at this point, many ways to get book that you simply wanted.

Christopher Palmer:

Do you like reading a e-book? Confuse to looking for your best book? Or your book was rare? Why so many issue for the book? But any people feel that they enjoy for reading. Some people likes reading through, not only science book but also novel and Next Generation Wireless Communications Using Radio over Fiber or maybe others sources were given expertise for you. After you know how the good a book, you feel desire to read more and more. Science guide was created for teacher as well as students especially. Those publications are helping them to increase their knowledge. In various other case, beside science guide, any other book

likes Next Generation Wireless Communications Using Radio over Fiber to make your spare time a lot more colorful. Many types of book like this one.
