### Basic Aircraft Control

The first ten hours of flight training should prepare a pilot to confidently maneuver any aircraft safely.

Most texts have only a basic summary of how control is applied. This book outlines the use of all aspects of flight control.

Proper understanding of how each control works and its application to aircraft maneuvering allows any pilot to be safe.

Additionally, there is discussion of how to visually maneuver an aircraft toward any specific destination.

There is discussion of flight maneuvering during emergency situations and how to make and survive off-field landings.
