Sistemas urbanos: entre lo contextual y lo autorreferencial (Spanish Edition) Andrés Cuesta Beleño

Sistemas urbanos: entre lo contextual y lo autorreferencial está centrado en el análisis, la interpretación, la argumentación y la intervención en los sistemas urbanos específicos de un territorio, a partir de una metodología de trabajo que permite tanto el cruce como el decantamiento de información, con el fin de obtener propuestas concertadas acordes con las deficiencias o necesidades del lugar o sitio específico de estudio. El autor ha implementado esta metodología en estudios prácticos de análisis y propuestas urbanas, teniendo en cuenta cuatro aspectos básicos que, a su vez, son las unidades del texto: los procesos formativos sobre sistemas urbanos; los principios de la teoría general, tradicional y moderna de los sistemas; los espacios emergentes como lugar borroso dentro del territorio, y las manifestaciones didácticas para la intervención en los sistemas urbanos, en diferentes niveles territoriales.
