Bluetooth Application Programming with the Java APIs (The Morgan Kaufmann Series in Networking)

C Bala Kumar, Paul J. Kline, Timothy J. Thompson

Bluetooth Application Programming with the Java APIs (The Morgan Kaufmann Series in Networking) C Bala Kumar, Paul J. Kline, Timothy J. Thompson

Adoption of Bluetooth wireless technology has made great strides in the last few years. One of the biggest steps forward-the standardization of Java APIs for Bluetooth wireless technology (JABWT)-is explained in detail in this book. The JABWT standard, defined by the JSR-82 specification, supports rapid development of Bluetooth applications that are portable, secure, and highly-usable. Wireless device manufacturers have responded to the JABWT specification by announcing mobile phones and other products that will run JABWT applications. Bluetooth Application Programming with the Java APIs explains in detail how to write Bluetooth applications using the Java APIs to exploit the power of both technologies. Written by the specification lead for JSR-82 and two other key participants in the definition of JABWT, this book provides the authoritative explanations and concrete examples you need to get started right away.

About the Authors

C Bala Kumar is a Distinguished Member of the Technical Staff at Motorola. He chaired the industry expert group that defined the Java APIs for Bluetooth wireless technology. He currently **leads the systems software team for wireless platforms** in Motorola's Semiconductor Products Sector. *Paul J. Kline* is a Distinguished Member of the Technical Staff at Motorola and the **maintenance lead for the JABWT specification**. He currently works on the System Software Architecture team in Motorola's Semiconductor Products Sector. *Timothy J. Thompson* is a Senior Software Engineer on the System Software Architecture team in Motorola's Semiconductor Products Sector. He was the **OBEX architect on the JABWT specification team** at Motorola.

- * Written by experts-the authors led the industry team that defined the JABWT standard and the Motorola team that developed the first JABWT implementation
- * Covers JABWT in depth and goes beyond the specification to explain how to use the standard effectively
- * A helpful resource both to Java programmers interested in Bluetooth wireless technology and to business managers interested in its potential for creating new business opportunities
- * Digs deeply into the programming areas you must master to successfully design and build JABWT applications, including RFCOMM, OBEX, device discovery, service discovery, and L2CAP
- * Details the real-world issues involved in programming Bluetooth devices and implementing the JABWT specification
- * Organized into sections that explicitly address the different needs of programmers, business managers, and project managers

From reader reviews:

Monte Lawson:

Within other case, little people like to read book Bluetooth Application Programming with the Java APIs (The Morgan Kaufmann Series in Networking). You can choose the best book if you appreciate reading a book. As long as we know about how is important any book Bluetooth Application Programming with the Java APIs (The Morgan Kaufmann Series in Networking). You can add information and of course you can around the world by way of a book. Absolutely right, simply because from book you can realize everything! From your country until finally foreign or abroad you will be known. About simple factor until wonderful thing it is possible to know that. In this era, we are able to open a book or even searching by internet device. It is called e-book. You should use it when you feel bored to go to the library. Let's learn.

Terry Grissom:

Book is to be different for each grade. Book for children until adult are different content. As you may know that book is very important for us. The book Bluetooth Application Programming with the Java APIs (The Morgan Kaufmann Series in Networking) was making you to know about other knowledge and of course you can take more information. It doesn't matter what advantages for you. The book Bluetooth Application Programming with the Java APIs (The Morgan Kaufmann Series in Networking) is not only giving you much more new information but also for being your friend when you truly feel bored. You can spend your personal spend time to read your guide. Try to make relationship with all the book Bluetooth Application Programming with the Java APIs (The Morgan Kaufmann Series in Networking). You never really feel lose out for everything in the event you read some books.

James Jernigan:

Reading a guide tends to be new life style on this era globalization. With studying you can get a lot of information which will give you benefit in your life. Together with book everyone in this world can share their idea. Textbooks can also inspire a lot of people. Many author can inspire their reader with their story or even their experience. Not only the story that share in the ebooks. But also they write about the data about something that you need case in point. How to get the good score toefl, or how to teach your kids, there are many kinds of book that you can get now. The authors nowadays always try to improve their talent in writing, they also doing some investigation before they write on their book. One of them is this Bluetooth Application Programming with the Java APIs (The Morgan Kaufmann Series in Networking).

Loren Hatmaker:

Do you like reading a book? Confuse to looking for your chosen book? Or your book had been rare? Why so many issue for the book? But almost any people feel that they enjoy with regard to reading. Some people likes reading through, not only science book and also novel and Bluetooth Application Programming with the Java APIs (The Morgan Kaufmann Series in Networking) or maybe others sources were given

understanding for you. After you know how the truly amazing a book, you feel want to read more and more. Science book was created for teacher or students especially. Those ebooks are helping them to add their knowledge. In some other case, beside science guide, any other book likes Bluetooth Application Programming with the Java APIs (The Morgan Kaufmann Series in Networking) to make your spare time more colorful. Many types of book like this one.
