**Abortion. Homosexuality. Environmentalism. Evolution.** Conservative positions on these topics are the current boundaries of mainstream Evangelical Christianity. But what if the theological arguments given by popular leaders on these “big four” were not quite as clear cut as they claim?

Growing up as an evangelical Christian, Jonathan Dudley was taught that faith was defined by the total rejection of abortion, homosexuality, evolution, and environmentalism. But once he had begun studying biology and ethics, his views began to change and he soon realized that what he had been told about the Bible – and those four big issues – may have been misconstrued. *Broken Words: The Abuse of Science and Faith in American Politics* assesses the scientific and cultural factors leading evangelicals to certain stances on each issue, shows where they went wrong, and critically challenges the scriptural, ethical, and biological arguments issued by those leaders today.

In *Broken Words*, Dudley applies the Bible and biology to challenge the fixed political dogmas of the religious right. Evangelicals are confronted for the first time from within their ranks on the extent to which faith has been corrupted by conservative politics, cultural prejudice and naive anti-intellectualism. A re-ordering of American Christianity is underway – and this book is an essential part of the conversation.
