Noise Reduction in Speech Applications (Electrical Engineering & Applied Signal Processing Series)

Noise Reduction in Speech Applications (Electrical Engineering & Applied Signal Processing Series)

Noise and distortion that degrade the quality of speech signals can come from any number of sources. The technology and techniques for dealing with noise are almost as numerous, but it is only recently, with the development of inexpensive digital signal processing hardware, that the implementation of the technology has become practical.

Noise Reduction in Speech Applications provides a comprehensive introduction to modern techniques for removing or reducing background noise from a range of speech-related applications. Self-contained, it starts with a tutorial-style chapter of background material, then focuses on system aspects, digital algorithms, and implementation. The final section explores a variety of applications and demonstrates to potential users of the technology the results possible with the noise reduction techniques presented.

The book offers chapters contributed by international experts, a practical, systems approach, and numerous references. For electrical, acoustics, signal processing, communications, and bioengineers, Noise Reduction in Speech Applications is a valuable resource that shows you how to decide whether noise reduction will solve problems in your own systems and how to make the best use of the technologies available.

From reader reviews:

Elvia Wirtz:

Book is actually written, printed, or descriptive for everything. You can realize everything you want by a reserve. Book has a different type. We all know that that book is important point to bring us around the world. Next to that you can your reading expertise was fluently. A reserve Noise Reduction in Speech Applications (Electrical Engineering & Applied Signal Processing Series) will make you to possibly be smarter. You can feel more confidence if you can know about every thing. But some of you think that will open or reading a book make you bored. It is not necessarily make you fun. Why they may be thought like that? Have you searching for best book or acceptable book with you?

Ellis Arnold:

The publication untitled Noise Reduction in Speech Applications (Electrical Engineering & Applied Signal Processing Series) is the guide that recommended to you to study. You can see the quality of the guide content that will be shown to an individual. The language that publisher use to explained their way of doing something is easily to understand. The article author was did a lot of analysis when write the book, therefore the information that they share to your account is absolutely accurate. You also can get the e-book of Noise Reduction in Speech Applications (Electrical Engineering & Applied Signal Processing Series) from the publisher to make you considerably more enjoy free time.

Nancy Gump:

Your reading 6th sense will not betray you, why because this Noise Reduction in Speech Applications (Electrical Engineering & Applied Signal Processing Series) e-book written by well-known writer whose to say well how to make book that may be understand by anyone who all read the book. Written inside good manner for you, still dripping wet every ideas and publishing skill only for eliminate your personal hunger then you still uncertainty Noise Reduction in Speech Applications (Electrical Engineering & Applied Signal Processing Series) as good book not only by the cover but also by the content. This is one e-book that can break don't ascertain book by its handle, so do you still needing a different sixth sense to pick this kind of!? Oh come on your reading sixth sense already said so why you have to listening to one more sixth sense.

Cynthia Tso:

That guide can make you to feel relax. That book Noise Reduction in Speech Applications (Electrical Engineering & Applied Signal Processing Series) was colorful and of course has pictures on the website. As we know that book Noise Reduction in Speech Applications (Electrical Engineering & Applied Signal Processing Series) has many kinds or genre. Start from kids until youngsters. For example Naruto or Investigator Conan you can read and believe that you are the character on there. So , not at all of book tend to be make you bored, any it makes you feel happy, fun and loosen up. Try to choose the best book to suit your needs and try to like reading in which.
