Trans-European Telecommunication Networks: The Challenges for Industrial Policy (Routledge Studies in the European Economy) Colin Turner

Examining the nature of telecommunication networks and the rationale for the development of trans-European networks, the study explores the features networks need to exhibit if they are to complement the broad themes of Europe's industrial policy, and demonstrates the economic importance of advanced telecommunications to business. The final chapters of the volume offer an analysis of the technology associated with the three chosen priorities of the EU in the development of advanced telecommunication infrastructure:

- * the Integrated Services Digital Network (ISDN)
- * the development of telematic networks
- * the development of broadband networks.
