Vegetation Ecology

Vegetation Ecology

Vegetation Ecology is a comprehensive account of plant communities and their environments. Written by leading experts in their field from four continents, this up-to-date, innovative text:

- covers the composition, structure, ecology, diversity, distribution and dynamics of plant communities, with an emphasis on functional adaptations to the abiotic and biotic processes governing plant communities;
- reviews the modern developments in vegetation ecology in a historical perspective;
- presents a coherent view on vegetation ecology while integrating population ecology, dispersal biology, biotic interactions, herbivory, interactions with soil organisms and ecosystem ecology; and
- tackles applied aspects of vegetation ecology, notably nature management, restoration ecology and global change studies.

Aimed at advanced undergraduates, graduates and researchers in plant ecology, geography, forestry and nature conservation, *Vegetation Ecology* takes an integrated, multi-disciplinary approach and will be welcomed as an essential reference for plant ecologists the world over.
