## **Environmental Tracking for Public Health Surveillance (ISPRS Book Series)**

Satellite imagery and data are widely used in public health surveillance to provide early warning of disease outbreaks and for averting pandemics. Convergence of these technologies began in the 1970s and has gained wide acceptance in the 21st Century.

**Environmental Tracking for Public Health Surveillance** focuses on the expanding use of satellite sensor imagery and long-term spectral measurements for assessing and modelling Earth's environments in context of public health surveillance. It addresses vector-borne, air-borne, water-borne, and zoonotic diseases, and explores analytical methods for forecasting environmental conditions and their potential for consequent disease outbreaks. Infectious and contagious diseases are of particular interest in this volume because once parasite-vector-human host pathways are triggered by favourable biological circumstances, pandemic diseases can spread to global scale in a matter of hours. The chapters advance readers through three sets of material. Part I reviews the 1970-2012 history of satellite Earth-science surveillance technology that led to linking natural environments to human diseases, and more generally to public health applications. Part II describes specific infectious and contagious diseases and the threat of emerging and re-emerging diseases. Part III explores the kinds of satellite data, modelling, and electronic information systems being developed to expedite health intercessions and responses at local to regional and global scales of reference. Equally important are the extensive reference sections for chapters in Parts II and III. For readers interested in tracking the development of Earth-science technology, these constitute a thorough entrée to both the health and environmental literature.

The chapters are written jointly by experts in both the health and Earth-science technologies. Each chapter is accompanied by an extensive list of citations to provide background and validation of the current state-of-the-art for a variety of high-interest human diseases and associated health and well-being issues. The importance of day-to-day weather patterns, the impacts of severe weather events and longer-term climate cycles form the basis for developing information systems that meet goals and expectations of national and international health monitoring bodies.

**Environmental Tracking for Public Health Surveillance** provides a state-of-the-art overview on how environmental tracking data from satellite, airborne, and ground-based sensors are being integrated into appropriate geophysical and spatial information system models to enhance public health surveillance and decision-making from local to global levels, and is intended primarily for a cross-disciplinary professional audience consisting of public health decision-makers, spatial data analysts, modelers, Earth observation specialists, and medical researchers.

### **From reader reviews:**

#### **Edward McCain:**

Book is to be different for each grade. Book for children until finally adult are different content. We all know that that book is very important for us. The book Environmental Tracking for Public Health Surveillance (ISPRS Book Series) has been making you to know about other know-how and of course you can take more information. It is rather advantages for you. The book Environmental Tracking for Public Health Surveillance (ISPRS Book Series) is not only giving you far more new information but also being your friend when you truly feel bored. You can spend your own personal spend time to read your e-book. Try to make relationship while using book Environmental Tracking for Public Health Surveillance (ISPRS Book Series). You never feel lose out for everything when you read some books.

#### **Christine Mata:**

Here thing why this kind of Environmental Tracking for Public Health Surveillance (ISPRS Book Series) are different and trusted to be yours. First of all examining a book is good but it really depends in the content than it which is the content is as delightful as food or not. Environmental Tracking for Public Health Surveillance (ISPRS Book Series) giving you information deeper since different ways, you can find any e-book out there but there is no book that similar with Environmental Tracking for Public Health Surveillance (ISPRS Book Series). It gives you thrill examining journey, its open up your eyes about the thing this happened in the world which is maybe can be happened around you. It is possible to bring everywhere like in recreation area, café, or even in your technique home by train. If you are having difficulties in bringing the published book maybe the form of Environmental Tracking for Public Health Surveillance (ISPRS Book Series) in e-book can be your substitute.

#### **Robert Dougherty:**

Precisely why? Because this Environmental Tracking for Public Health Surveillance (ISPRS Book Series) is an unordinary book that the inside of the reserve waiting for you to snap that but latter it will shock you with the secret the idea inside. Reading this book close to it was fantastic author who write the book in such incredible way makes the content inside of easier to understand, entertaining approach but still convey the meaning completely. So , it is good for you because of not hesitating having this any longer or you going to regret it. This unique book will give you a lot of positive aspects than the other book possess such as help improving your expertise and your critical thinking way. So , still want to postpone having that book? If I had been you I will go to the reserve store hurriedly.

#### **Clyde Traynor:**

Playing with family in a very park, coming to see the sea world or hanging out with close friends is thing that usually you might have done when you have spare time, subsequently why you don't try factor that really opposite from that. A single activity that make you not sense tired but still relaxing, trilling like on roller

coaster you have been ride on and with addition of information. Even you love Environmental Tracking for Public Health Surveillance (ISPRS Book Series), it is possible to enjoy both. It is fine combination right, you still want to miss it? What kind of hang-out type is it? Oh can happen its mind hangout folks. What? Still don't get it, oh come on its identified as reading friends.
