Lubricants are essential in engineering, however more sustainable formulations are needed to avoid adverse effects on the ecosystem. Bio-based lubricant formulations present a promising solution. **Biolubricants: Science and technology** is a comprehensive, interdisciplinary and timely review of this important subject.

Initial chapters address the principles of lubrication, before systematically reviewing fossil and bio-based feedstock resources for biodegradable lubricants. Further chapters describe catalytic, (bio) chemical functionalisation processes for transformation of feedstocks into commercial products, product development, relevant legislation, life cycle assessment, major product groups and specific performance criteria in all major applications. Final chapters consider markets for biolubricants, issues to consider when selecting and using a lubricant, lubricant disposal and future trends.

With its distinguished authors, **Biolubricants: Science and technology** is a comprehensive reference for an industrial audience of oil formulators and lubrication engineers, as well as researchers and academics with an interest in the subject. It provides an essential overview of scientific and technological developments enabling the cost-effective improvement of biolubricants, something that is crucial for the green future of the lubricant industry.

- A comprehensive, interdisciplinary and timely review of bio-based lubricant formulations
- Addresses the principles of lubrication
- Reviews fossil and bio-based feedstock resources for biodegradable lubricants

From reader reviews:

Tina West:

Here thing why this kind of Biolubricants: Science and Technology (Woodhead Publishing Series in Energy) are different and trustworthy to be yours. First of all reading a book is good however it depends in the content from it which is the content is as tasty as food or not. Biolubricants: Science and Technology (Woodhead Publishing Series in Energy) giving you information deeper since different ways, you can find any book out there but there is no e-book that similar with Biolubricants: Science and Technology (Woodhead Publishing Series in Energy). It gives you thrill looking at journey, its open up your own personal eyes about the thing that will happen in the world which is might be can be happened around you. It is possible to bring everywhere like in area, café, or even in your method home by train. If you are having difficulties in bringing the imprinted book maybe the form of Biolubricants: Science and Technology (Woodhead Publishing Series in Energy) in e-book can be your choice.

Perla Baxter:

Nowadays reading books are more than want or need but also get a life style. This reading habit give you lot of advantages. The advantages you got of course the knowledge your information inside the book that improve your knowledge and information. The details you get based on what kind of publication you read, if you want have more knowledge just go with knowledge books but if you want feel happy read one using theme for entertaining for example comic or novel. The Biolubricants: Science and Technology (Woodhead Publishing Series in Energy) is kind of publication which is giving the reader erratic experience.

Barbra Poole:

The publication untitled Biolubricants: Science and Technology (Woodhead Publishing Series in Energy) is the guide that recommended to you you just read. You can see the quality of the book content that will be shown to you. The language that creator use to explained their way of doing something is easily to understand. The copy writer was did a lot of exploration when write the book, hence the information that they share to your account is absolutely accurate. You also might get the e-book of Biolubricants: Science and Technology (Woodhead Publishing Series in Energy) from the publisher to make you far more enjoy free time.

Jamie Gregory:

Is it anyone who having spare time then spend it whole day by watching television programs or just lying on the bed? Do you need something totally new? This Biolubricants: Science and Technology (Woodhead Publishing Series in Energy) can be the answer, oh how comes? A fresh book you know. You are therefore out of date, spending your extra time by reading in this fresh era is common not a geek activity. So what these publications have than the others?
