Processes employed to develop US agricultural policies, the structure and function of government that develops and implements agricultural policy, and the specific evolution of policy from the early twentieth century to the Agricultural Act of 2014 are included. Specific policies in past farm bills are detailed in order to track their evolution and economic effects.

This debate continues today and can be seen in a gradual change over time from taxes and tariffs to risk management. Information presented does not attempt to influence the readership towards a pro or con position but rather to present information to help the readers to understand the issues related to agricultural policy in the US.
