Enterprise Architecture at Work: Modelling, Communication and Analysis (The Enterprise Engineering Series) Marc Lankhorst

An enterprise architecture tries to describe and control an organisation's structure, processes, applications, systems and techniques in an integrated way. The unambiguous specification and description of components and their relationships in such an architecture requires a coherent architecture modelling language.

Lankhorst and his co-authors present such an enterprise modelling language that captures the complexity of architectural domains and their relations and allows the construction of integrated enterprise architecture models. They provide architects with concrete instruments that improve their architectural practice. As this is not enough, they additionally present techniques and heuristics for communicating with all relevant stakeholders about these architectures. Since an architecture model is useful not only for providing insight into the current or future situation but can also be used to evaluate the transition from 'as-is' to 'to-be', the authors also describe analysis methods for assessing both the qualitative impact of changes to an architecture and the quantitative aspects of architectures, such as performance and cost issues.

The modelling language presented has been proven in practice in many real-life case studies and has been adopted by The Open Group as an international standard. So this book is an ideal companion for enterprise IT or business architects in industry as well as for computer or management science students studying the field of enterprise architecture.

From reader reviews:

Brent Abramson:

In this era globalization it is important to someone to receive information. The information will make anyone to understand the condition of the world. The fitness of the world makes the information much easier to share. You can find a lot of recommendations to get information example: internet, paper, book, and soon. You will observe that now, a lot of publisher in which print many kinds of book. Typically the book that recommended to you is Enterprise Architecture at Work: Modelling, Communication and Analysis (The Enterprise Engineering Series) this e-book consist a lot of the information of the condition of this world now. That book was represented so why is the world has grown up. The dialect styles that writer use for explain it is easy to understand. Typically the writer made some exploration when he makes this book. Honestly, that is why this book appropriate all of you.

Kenneth Poor:

Many people spending their period by playing outside together with friends, fun activity together with family or just watching TV all day long. You can have new activity to shell out your whole day by looking at a book. Ugh, do you consider reading a book can really hard because you have to accept the book everywhere? It alright you can have the e-book, delivering everywhere you want in your Mobile phone. Like Enterprise Architecture at Work: Modelling, Communication and Analysis (The Enterprise Engineering Series) which is obtaining the e-book version. So , try out this book? Let's find.

Starr Place:

Publication is one of source of know-how. We can add our understanding from it. Not only for students but also native or citizen need book to know the change information of year to year. As we know those publications have many advantages. Beside we add our knowledge, may also bring us to around the world. With the book Enterprise Architecture at Work: Modelling, Communication and Analysis (The Enterprise Engineering Series) we can consider more advantage. Don't one to be creative people? To become creative person must like to read a book. Simply choose the best book that ideal with your aim. Don't possibly be doubt to change your life by this book Enterprise Architecture at Work: Modelling, Communication and Analysis (The Enterprise Engineering Series). You can more inviting than now.

Steven Strong:

Reading a guide make you to get more knowledge from this. You can take knowledge and information from a book. Book is created or printed or created from each source this filled update of news. On this modern era like currently, many ways to get information are available for you. From media social such as newspaper, magazines, science e-book, encyclopedia, reference book, novel and comic. You can add your knowledge by that book. Are you ready to spend your spare time to spread out your book? Or just in search of the Enterprise Architecture at Work: Modelling, Communication and Analysis (The Enterprise Engineering

Series) when you necessary it?
